## Bioinformatics Concentration (9376)

## Associate of Applied Science Degree

Bioinformatics develops and uses computer software to analyze and manage biological data. Bioinformatics is fundamental to modern biological research and to the development of individualized medicine that will combine genome analysis, medical records, and results of clinical trials and research to tailor treatments and prevention regimen. Graduates of this program will fill the need for scientists with knowledge of biology, genetics, molecular biology, database management, and computer programming. This program is a hybrid technical program that contains approximately equal amounts of Lakeland's biotechnology science and information technology/ computer science courses. Job opportunities include biology and biomedical research, healthcare, and biomedical informational services sectors.

A minimum GPA of 2.0 and a grade of " C " or above is required for all science, math and program specific courses. Satisfactory/ Unsatisfactory grades may not be used to fulfill health program requirements.
