

Chemical Technician Certificate (3701)

This certificate program prepares students for employment as chemical technicians. Working under the supervision of chemists and chemical engineers, chemical technicians use the principles and theories of chemistry to solve problems in research and development by operating and maintaining laboratory instruments, monitoring experiments, making observations, and calculating and recording results. They work with sophisticated laboratory equipment in performing testing and analyses on chemical samples, and synthesizing and improving products. In addition to performing routine tasks, chemical technicians may also develop and adapt new laboratory procedures to achieve the best results, interpret data, and devise solutions to problems.

A minimum GPA of 2.0 and a "C" grade or higher is required in all science and program-specific courses for graduation.

Note: CHEM 1500 General Chemistry I has prerequisites that include high school chemistry or CHEM 1100 Elementary Chemistry I: Intro to Inorganic Chemistry. Students may need to take additional courses if they do not already meet these prerequisite requirements.

Course	Title	Credit Hours
CHEM 1500	General Chemistry I	5
CHEM 1600	General Chemistry II	5
CHEM 2000	Quantitative Analysis	5
CHEM 2500	Organic Chemistry I	5
CHEM 2600	Organic Chemistry II	5
MATH 1650	College Algebra (A)	4
MATH 1700	Trigonometry	3
Total Credit Hours		32
