

Data Analytics Concentration (9258)

Associate of Applied Business Degree

This program prepares students for entry-level employment in the field of data analytics. Students will gain understanding in data modeling, database normalization, and SQL for data processing and obtain skills and utilize tools that are necessary for data storage, processing, analysis, visualization and application issues. Data analysts are responsible for extracting, categorizing and analyzing data, in order to identify patterns, behaviors and trends, as well as utilizing different reporting, modeling and analytical techniques. In addition to employment opportunities, students have the option to continue their education beyond the two-year associate degree program by enrolling in four-year programs at local universities.

NOTE: Students planning to transfer to a four-year college are encouraged to take ENGL 1120 English Composition II in addition to the following requirements.
