Information Technology and Computer Science

The Information and Computer Science department at Lakeland provides instruction in the current high demand Information Technology (IT) skill sets including, programming languages, systems development and support, web content development, database development, administration and analysis, hardware and software usage and support, and networking administration. There are six areas of concentration available within the degree program as well as seven certificate programs that prepare students for entry into the IT field which, according to the U.S. Bureau of Labor Statistics, will see significant increase in employment through 2022.

Gainful Employment Programs; reporting available in compliance with the U.S Department of Education

Computer Science

**ITCS 1010 Programming Logic** 3 Credits

Prerequisite: ITIS 1005 or ITIS 1007, a grade of "SC" or better in MATH 0850 or placement test; or permission of instructor. This course provides an introduction to problem-solving techniques, the steps of the program development cycle, and fundamental skills needed for programming in any computer language.

Students will develop logic plans and create programs using core programming instructions to solve a variety of problems and will use one or more programming languages to gain experience with the complete program development process. The course includes an introduction to object-oriented and event-driven programming, and to the IDE (Integrated Development Environment).

(4.5 contact hours: 1.5 lecture, 3 lab)

**ITCS 1105 Web Programming** (CTAG) 3 Credits

Prerequisite: GRDS 1375 or ITCS 1010 and ITIS 1100; or permission of instructor. This course provides introductory and intermediate techniques using the current version of HTML (Hypertext Markup Language) to create and manage web pages. Students will explore ways of presenting text, data, and graphics in a browser based environment.

Students will explore the use of several HTML editing tools to aid in site management.

(4.5 contact hours: 1.5 lecture, 3 lab)
ITCS 1820 Java Programming I 3 Credits
Prerequisite: ITCS 1010 or permission of instructor.
This course provides an introduction to application development, object-oriented programming, and the Java development system. Students will write object-oriented Java applications and applets using methods, variables, operators, strings, arrays, loops, selection statements, classes, inheritance, and encapsulation.
(5 contact hours: 1 lecture, 4 lab)

ITCS 1825 Programming I for iOS 3 Credits
Prerequisite: ITCS 1010 or permission of instructor.
This course introduces students to Apple's current development language and object-oriented programming concepts. Students will write programs using classes, methods, input/output, inheritance, and polymorphism for the iPhone/iPad.
(5 contact hours: 1 lecture, 4 lab)

ITCS 1870 Python Programming I 3 Credits
Prerequisite: ITCS 1010 or permission of instructor.
This course introduces students to the Python programming language. Students will write procedural and object-oriented applications. Student programs will include arithmetic operations, strings, functions, decisions and loops, and object-oriented constructs. (5 contact hours: 1 lecture, 4 lab)

ITCS 1880 R Programming I 3 Credits
Prerequisite: ITCS 1010, ITDB 1400, ITIS 1520, MATH 1550 or MATH 2135; or permission of instructor.
This course introduces students to the R programming language. Students will write procedural and object-oriented applications. Student programs will include arithmetic/statistical operations, strings, functions, decisions and loops, and object-oriented constructs. Students will read data into R, access packages, profile code, and present meaningful output of results.
(5 contact hours: 1 lecture, 4 lab)

ITCS 2010 Systems Analysis 3 Credits
Prerequisite: ENGL 1120 or ENGL 1121, ITCS 1010, ITIS 1115 (can be taken concurrently) or ITON 1205 (can be taken concurrently) or CNET 1100 (can be taken concurrently); or permission of instructor.
This course provides an in-depth experience of the business information systems development process, with emphasis on the investigation, analysis, and design phases. Students will study the role of the systems analyst, examine and apply tools used for system design, and, through participation in a team project and presentation, gain experience with the design of a business information system.
(4 contact hours: 2.5 lecture, 1.5 lab)

ITCS 2012 Discrete Structures 3 Credits
Prerequisite: MATH 1650 or higher, CPET 1120 or ITCS 1825 or ITCS 1820 or ITCS 1870; or permission of instructor.
This course provides an introduction to the foundations of discrete mathematics as they apply to computer science, and focuses on providing a solid theoretical foundation for further work. Topics include logic, set algebra, equivalence relations and partitions, functions, mathematical induction, cardinality, recurrence relations, basic combinatorial methods, and trees and graphs; with an emphasis on applications in computer science.
(3 contact hours)

ITCS 2080 Fundamentals of Software Engineering 3 Credits
Prerequisite: ITCS 1820 or ITCS 1825 or ITCS 1870; or permission of instructor.
This course introduces the basic principles and concepts of software engineering and provides the necessary foundation for subsequent SE courses at the upper division level. Topics include: basic terminology and concepts of software engineering; system requirements, modeling, and testing; object oriented analysis and design using UML; frameworks and APIs; client-server architecture; user interface technology; and the analysis, design, and programming of simple servers and clients.
(4 contact hours: 2.5 lecture, 1.5 lab)

ITCS 2105 Web Programming II 3 Credits
Prerequisite: ITCS 1105, ITCS 1820, ITCS 2120 (can be taken concurrently); or permission of instructor.
This course introduces intermediate and advanced techniques using various markup languages for the Internet in a microcomputer environment. Students will use previously mastered procedural and object-oriented techniques and concepts to develop complex programs using intermediate XHTML, CSS, XML, Internet programming languages, and other advanced techniques as the languages and protocols evolve. Students will also learn the vocabulary and process of group based code and user interface review. Students who have taken the prerequisite courses more than two years prior to attempting this course may wish to retake those courses before attempting ITCS 2105 to ensure current knowledge of the information and the profession.
(5 contact hours: 1 lecture, 4 lab)
ITCS 2120 JavaScript Programming I 3 Credits
Prerequisite: ITCS 1820 or ITCS 1825 or ITCS 1870, ITCS 1105; or permission of instructor.
This course introduces JavaScript programming in a hands-on microcomputer environment. JavaScript programming is used extensively in web page design to allow information to be processed on a web page before being sent to a web server for processing. Students will also learn the vocabulary and process of group based code and user interface review. Students who have taken the prerequisite courses more than two years prior to attempting this course may wish to retake those courses before attempting ITCS 2120 to ensure current knowledge of the information and the profession.
(4.5 contact hours: 1.5 lecture, 3 lab)

ITCS 2170 Introduction to ASP.NET 2 Credits
Prerequisite: ITCS 1010, ITCS 1105, ITDB 1400; or permission of instructor.
This course introduces ASP.NET programming for the Internet in a microcomputer environment. Students will study intermediate HTML, Web scripting, and other advanced techniques to create dynamic Web applications using server-side technology with ASP.NET.
(3.25 contact hours: 0.75 lecture, 2.5 lab)

ITCS 2820 Java/Android Programming II 3 Credits
Prerequisite: ITCS 1820, ITDB 1400 (can be taken concurrently) or ITDB 1430 (can be taken concurrently); or permission of instructor.
This course provides advanced instruction in current standard Java program development methodologies and object-oriented programming with an emphasis on mobile application development. Students will use mobile class libraries and J2ME (Java 2 Micro Edition) to create applications for mobile devices.
(5 contact hours: 1 lecture, 4 lab)

ITCS 2821 Java/Android Programming III 2 Credits
Prerequisite: ITCS 2820.
This course provides advanced instruction in Android's current development environment with an emphasis on designing, creating and publishing professional Android mobile applications.
(3.5 contact hours: 0.5 lecture, 3 lab)

ITCS 2825 Programming II for iOS 3 Credits
Prerequisite: ITCS 1825, ITDB 1400 (can be taken concurrently) or ITDB 1430 (can be taken concurrently); or permission of instructor.
This course provides advanced instruction in Apple's current development language methodologies and object-oriented programming with an emphasis on mobile application development. Students will use mobile class libraries and the Apple Coco class library to create applications for mobile devices.
(5 contact hours: 1 lecture, 4 lab)

ITCS 2826 Programming III for iOS 2 Credits
Prerequisite: ITCS 2825.
This course provides advanced instruction in Apple's current development environment with an emphasis on designing, creating and publishing professional iOS mobile applications.
(3.5 contact hours: 0.5 lecture, 3 lab)

ITCS 2848 .NET Programming 3 Credits
Prerequisite: ITCS 1820 or ITCS 1825 or permission of instructor.
This course provides advanced instruction in application development for the .NET programming environment. Students will apply previously acquired programming knowledge from prerequisite programming classes to enhance object-oriented programming expertise. Students will learn various skills, including the Visual Studio Integrated Development Environment, reflection, threading, regular expressions, database connectivity, web application, and more to create professional applications.
(5 contact hours: 1 lecture, 4 lab)

ITCS 2870 Data Structures 4 Credits
Prerequisite: CPET 1120, ITCS 1870, MATH 2500; or permission of instructor.
This traditional computer science course introduces students to advanced data structure concepts including objects and inheritance, algorithm analysis, recursion, stacks, queues, lists, randomization, trees, sorting and searching, hash tables, and graphs and paths.
(6 contact hours: 2 lecture, 4 lab)

ITCS 2875 Computer Architecture and Organization 3 Credits
Prerequisite: ITCS 2870, ITON 1011, MATH 2500; or permission of instructor.
This course provides a study of the principles of Von Neumann computer architecture, data representation, and memory addressing as well as processor organization and its impact on system and application software. It also includes discussion and utilization of assembly language and computer processor simulators.
(5 contact hours: 1 lecture, 4 lab)
ITCS 2900 Special Topics in Information Technology/Computer Science 1-4 Credits
These specialized courses provide in-depth examinations of Information Technology Computer Science/Programming topics not covered in detail elsewhere in the curriculum.
(1-4 contact hours)

Database

ITDB 1300 Introduction to Database Theory 2 Credits
Prerequisite: ITIS 1007 or permission of instructor.
This course provides a foundation in relational database theory. Students will learn various concepts as they apply to relational database management including the importance of database in application, data modeling, database normalization, and SQL for data processing.
Students will also be introduced to concepts in data analytics and database administration.
(2.5 contact hours: 1.5 lecture, 1 lab)

ITDB 1400 Introduction to SQL 2 Credits
Prerequisite: ITIS 1005 or ITIS 1007 or permission of instructor.
This course provides an introduction to SQL (Structured Query Language) to create and maintain database objects, manipulate data, and to produce readable output displays and reports. Students will use the Oracle relational database management system along with DDL (Data Definition Language), DML (Data Manipulation Language), and SQL*Plus format commands. This course and ITDB 1405 Introduction to Oracle SQL/PL help students prepare for the Introduction to Oracle: SQL and PL/SQL certification exam. Although it is not a prerequisite for this course, students may benefit from taking a programming course prior to taking this course.
(3 contact hours: 1 lecture, 2 lab)

ITDB 1405 Oracle PL/SQL Programming 2 Credits
Prerequisite: ITCS 1010, ITDB 1400; or permission of instructor.
This course continues the study of the Oracle relational database management system by providing an introduction to the Oracle PL (Procedural Language). Students will write PL with embedded SQL (Structured Query Language) to interact with an Oracle Server, create control structures, write explicit cursors, and handle exceptions. Additional concepts include procedures, functions, packages, and triggers. This course helps students prepare for Oracle certification.
(3.25 contact hours: 0.75 lecture, 2.5 lab)

ITDB 1406 Microsoft SQL Concepts 2 Credits
Prerequisite: ITIS 1005 or ITIS 1007 or permission of instructor.
This course provides students with knowledge about SQL (Structured Query Language) along with an introduction to programming objects using Microsoft SQL. Students will use Microsoft SQL Server to write queries, create and modify data, and create database objects such as views, stored procedures and functions, and triggers. This course helps students prepare for Microsoft SQL Server certification. Although it is not a prerequisite for this course, students may benefit from taking ITDB 1400 Introduction to SQL prior to taking this course.
(3 contact hours: 1 lecture, 2 lab)

ITDB 1430 Microsoft Access Relational Database 3 Credits
Prerequisite: ITIS 1000 or ITIS 1005 or ITIS 1007 or permission of instructor
This course provides a comprehensive study of database management in a Microsoft Windows environment.
Students will develop database structures, create and maintain tables, run and save queries, sort and filter records, and create and customize forms and reports. Advanced topics include creating and running macros, creating switchboards, and writing Visual Basic code. This course is cross-listed as ITIS 1530 Microsoft Office Access: Skills and Techniques and ITDB 1430 Microsoft Access Relational Database. Students who have taken this course under the alternative course ID should not take this course.
(4.5 contact hours: 1.5 lecture, 3 lab)

ITDB 2417 Oracle Database Administration 3 Credits
Prerequisite: ITDB 1405 or permission of instructor.
This course introduces students to various database administrative skills, including installing, starting up and shutting down, and maintaining an Oracle database, as well as advanced skills, including networking, backup and recovery, automating database management, managing resources, and transferring data. The course helps students prepare for the Oracle Database Administration certification exams.
(4 contact hours: 2 lecture, 2 lab)
**ITDB 2427 Microsoft SQL Server Administration**  
3 Credits  
Prerequisite: ITDB 1406 or permission of instructor.  
This course instructs students in programming and implementing a Microsoft SQL Server database. Students will gain technical skills in creating and managing database objects, such as views and stored procedures. Students will gain additional knowledge in the maintenance of SQL elements, including indexes, data types, and constraints. This course also provides an understanding of database optimization and analysis. This course provides students with various database administrative skills, such as installing, maintaining, backing up, and recovering a Microsoft SQL Server database. Students will also learn how to perform other administrative tasks, including configuring and troubleshooting. This course helps students prepare for the Microsoft certification exams.  
(4 contact hours: 2 lecture, 2 lab)

**ITDB 2500 Data Analytics**  
3 Credits  
Prerequisite: ITDB 1405, ITCS 1880; or permission of instructor.  
This course provides students with a range of concepts, techniques and applications of data analytics in various settings. Students will gain experience in data storage, processing, analysis, visualization, and application issues as well as hands-on experience using various tools for data analysis.  
(4.5 contact hours: 1.5 lecture, 3 lab)

**Information Systems**

**ITIS 1000 Basic Computer Skills**  
1 Credit  
This course provides an overview of computer concepts and introductory training in the use of computer hardware and software. Students will study computer equipment, computer software, and related terminology. The course includes the fundamentals of using operating system and productivity software, Internet tools and services, and an introduction to an e-Learning environment using Blackboard. The selected software studied in this course includes the Microsoft Office Suite and the Google Apps (aka G Suite). Either ITIS 1005 Computer Essentials or ITIS 1000 serves as a prerequisite for other IT&CS courses. Students who have taken ITIS 1005 should not take this course.  
(2.5 contact hours: 0.5 lecture, 2 lab)

**ITIS 1005 Computer Essentials**  
(TAG) 3 Credits  
This computer literacy course provides a fundamental knowledge of computers and their role in today's society. Students will study computer equipment, computer software, and related terminology. The course also provides introductory training in the use of computer hardware and software, including the fundamentals of using operating system and productivity software, Internet tools and services, as well as an introduction to an e-Learning environment using Blackboard. The selected software studied in this course includes the Microsoft Office Suite and Google Apps (aka G Suite). Either ITIS 1000 Basic Computer Skills or ITIS 1005 serves as a prerequisite for other IT&CS courses. This course meets the Transfer Assurance Guides (TAG: OBU003) and Career Technical Assurance Guides (CTAG: CTIT001) requirements for Ohio's Articulation and Transfer Policy.  
(5 contact hours: 1 lecture, 4 lab)

**ITIS 1007 Principles of Information Technology and Computer Science**  
3 Credits  
This course is an introduction to the fields of information technology and computer science. It includes foundational concepts of computing including algorithms, computer architecture, databases, human-computer interaction, programming languages and concepts, operating systems, networking, and the Internet. Students will have the opportunity to explore how computing has made innovations in other fields possible and will examine the ethical implications of computing technologies as well as gain an introduction to the process of computational thinking. This course presents the basics of computer science principles as outlined in the AP Computer Science Principles exam.  
(4 contact hours: 2.5 lecture, 1.5 lab)

**ITIS 1008 Ethics in Information Technology**  
1 Credit  
Prerequisite: ITIS 1000 or ITIS 1005 or ITIS 1007 or permission of instructor.  
This course provides an understanding of ethical and societal issues in today's Information Technology (IT) world. It includes an overview of ethics for IT professionals and topics on computer crime, software development, intellectual property, IT impact on quality of life, morality, and codes of ethics and conduct.  
(1.5 contact hours: 0.5 lecture, 1 lab)

**ITIS 1025 Managing and Optimizing Personal Computers**  
3 Credits  
Prerequisite: ITIS 1005 or ITIS 1007 or ENGR 1000, ITON 1070; or permission of instructor.  
This course provides a fundamental knowledge of personal computer hardware and operating systems software. Students will use various software utilities to maintain, troubleshoot, and optimize the operations of PCs in a Windows environment. Topics include troubleshooting fundamentals and support techniques.  
(4.5 contact hours: 1.5 lecture, 3 lab)
ITIS 1030 Security Awareness
This course provides a basic introduction to practical security knowledge of computers and related technology equipment. It covers all aspects of information security and explains the value of securing data, both for home users and the workplace. The course introduces ethical policies at government, organizational, and individual levels, the importance of data confidentiality and integrity, risk management, common threats and countermeasures, wired and wireless networks, Internet risks, and personal security defenses. Hands-on exercises will demonstrate several course concepts in a Windows environment.
(2 contact hours: 0.5 lecture, 1.5 lab)

ITIS 1100 Internet: Services, Tools and Web Page Creation
Prerequisite: ITIS1000 (can be taken concurrently) or ITIS1005 (can be taken concurrently) or ITIS 1007 (can be taken concurrently) or permission of instructor.
This course provides an overview of the Internet including services, tools, and web page creation. Topics also include a brief history of the Internet, browser basics, refined searching techniques, Internet security, electronic commerce, and societal issues. Students will use a browser program with special emphasis on the functions of email, mailing lists (listservs), newsgroups, chatting, search engine usage, wikis, blogs, and file transfer protocol. They will also learn and use basic HTML code to design and create web pages.
(3 contact hours: 1 lecture, 2 lab)

ITIS 1102 Internet: Services, Tools, and Web Page Design
Prerequisite: ITIS 1000 (can be taken concurrently) or ITIS 1005 (can be taken concurrently) or ITIS 1007 (can be taken concurrently) or permission of instructor.
This introductory course provides an overview of the Internet including services, tools, and Web page creation. Topics also include a brief history of the Internet, browser basics, refined searching techniques, Internet security, electronic commerce, and societal issues. Students will also learn and use basic HTML code to design and create Web pages. Web design techniques for effective Web page creation will be studied along with information presentation and audience considerations when building a Web page.
(4 contact hours: 2.5 lecture, 1.5 lab)

ITIS 1108 Using an HTML Editor
Prerequisite: ITIS 1000 or ITIS 1005 or ITIS 1007 or GRDS 1375 or permission of instructor.
This course provides continued instruction in the use of HTML. Students will build on skills and knowledge from ITCS 1105 Web Programming I and incorporate the use of an HTML editor program. Students will use the Adobe Dreamweaver Web authoring tool to develop Web pages and use templates and wizards/coaches to simplify Web page development. The course will examine other authoring tools as the industry evolves.
(3 contact hours: 1 lecture, 2 lab)

ITIS 1115 Internet Technologies and Concepts
Prerequisite: ITIS 1005 or ITIS 1007 or ENGR 1000 or permission of instructor.
This course provides a vendor-neutral focus on the technology behind the Internet with a comprehensive overview of Internet concepts. Students will examine Internet fundamentals; Internet clients; Web development tools and concepts; networking hardware, software, protocols, and topologies; security concepts and features; and e-business concepts and models.
(3 contact hours: 1 lecture, 2 lab)

ITIS 1130 Introduction to Web Design
Prerequisite: ITIS 1000 or ITIS 1005 or ITIS 1007 or BUSM 1700 (can be taken concurrently) or GRDS 1375 or permission of instructor.
This course introduces techniques for effective Web page design. The course helps students design Web sites by focusing on information presentation and audience considerations as well as features and tools available to enhance sites.
(1.5 contact hours: 0.5 lecture, 1 lab)

ITIS 1355 Security+ and Security Essentials
Prerequisite: ITIS 1005 or ITIS 1007 or ITON 1011 or permission of instructor.
This course introduces the basics of network security including computer network vulnerabilities and threats and how to circumvent them by providing safeguards and countermeasures. Students will explore network security planning, network security technology, network security organization, and the legal and ethical issues associated with network security. This course helps students prepare for CompTIA's Security+ certification.
(5 contact hours: 2 lecture, 3 lab)

ITIS 1360 Introduction to Computer Forensics and Investigations
Prerequisite: ITON 1748, ITIS 1355 or Security+ Certification; or permission of instructor.
This course introduces the basics of network security including computer network vulnerabilities and threats and how to circumvent them by providing safeguards and countermeasures. Students will explore network security planning, network security technology, network security organization, and the legal and ethical issues associated with network security. This course helps students prepare for CompTIA's Security+ certification.
(5 contact hours: 1 lecture, 4 lab)
ITIS 1510 Microsoft Office Word: Skills and Techniques  3 Credits
Prerequisite: ITIS 1000 or ITIS 1005 or ITIS 1007 or permission of instructor.
This course provides a comprehensive study of word processing software. Students will create and edit documents, enhance text using various formatting options, and use proofing tools. In addition, the course will explore ways to enhance page layout and design using themes, styles, and templates. Advanced topics include creating tables, performing a mail merge, creating and running macros, and creating online documents and forms.
(4.5 contact hours: 1.5 lecture, 3 lab)

ITIS 1520 Microsoft Office Excel: Skills and Techniques  3 Credits
Prerequisite: ITIS 1000 or ITIS 1005 or ITIS 1007 or permission of instructor.
This course provides a comprehensive study of electronic spreadsheets. Students will design, create, edit, and format spreadsheets, charts, and tables. In addition, the course will explore ways to utilize spreadsheet functions in data analysis. Advanced topics include handling multiple worksheets as well as creating and using templates, macros, defined names, databases, data protection and validation, and pivot tables.
(4.5 contact hours: 1.5 lecture, 3 lab)

ITIS 1530 Microsoft Office Access: Skills and Techniques  3 Credits
Prerequisite: ITIS 1000 or ITIS 1005 or ITIS 1007 or permission of instructor.
This course provides a comprehensive study of database management in a Microsoft Windows environment. Students will develop database structures, create and maintain tables, run and save queries, sort and filter records, and create and customize forms and reports. Advanced topics include creating and running macros, creating switchboards, and writing Visual Basic code. This course is cross-listed as ITIS 1530 Microsoft Office Access: Skills and Techniques and ITDB 1430 Microsoft Access Relational Database. Students who have taken the course under the alternative course ID should not take this course.
(4.5 contact hours: 1.5 lecture, 3 lab)

ITIS 1540 Microsoft Office PowerPoint: Skills and Techniques  2 Credits
Prerequisite: ITIS 1000 or ITIS 1005 or ITIS 1007 or permission of instructor.
This course provides a comprehensive study of presentation graphics in a Microsoft Windows environment. Students will create, edit, and display slide shows while using design templates, special effects, and various presentation views. Additional topics include embedding and modifying text, spreadsheets, graphs, organizational charts, clip art, and graphic objects.
(3 contact hours: 1 lecture, 2 lab)

ITIS 1550 Using Microsoft Office: Word and Excel  3 Credits
Prerequisite: ITIS 1000 or ITIS 1005 or ITIS 1007 or permission of instructor.
This course provides a study of how to use word processing and electronic spreadsheet software. Students will design, create, edit, and format documents, spreadsheets, charts, and tables. In addition, the course will explore ways to enhance page layout and design using styles and templates, as well as utilize spreadsheet formulas and functions in data analysis. Additional topics include performing a mail merge and importing data into a spreadsheet.
(4.5 contact hours: 1.5 lecture, 3 lab)

ITIS 1560 Microsoft Office Project: Skills and Techniques  3 Credits
Prerequisite: ITIS 1000 or ITIS 1005 or ITIS 1007 or permission of instructor.
This course provides a comprehensive study of project management software using Microsoft Project. Students will use the software to create a work breakdown structure, define task dependencies, calculate task durations, assign resources and costs to tasks, and determine the critical path. Advanced topics include variance analysis and displaying project information using tables, filters, groups, and views.
(4.5 contact hours: 1.5 lecture, 3 lab)

ITIS 2015 Information Technology Project Management  3 Credits
Prerequisite: BUSM 1300, ITIS 1005 or ITIS 1007; or permission of instructor.
This course develops project management skills needed to define, plan, lead, monitor, and complete Information Technology projects. Students will study the role of the project manager and examine and apply tools used for project management.
(4 contact hours: 2.5 lecture, 1.5 lab)

ITIS 2355 Security Investigation and Penetration Studies  3 Credits
Prerequisite: ITON 1748, ITIS 1355 or Security+ Certification; or permission of instructor.
This course introduces the network security specialist to the various methodologies for attacking a network. Students will explore the concepts, principles and techniques, supplemented by hands-on exercises, for attacking and disabling a network. The course presents these methodologies within the context of properly securing the network. It emphasizes network attack methodologies with the use of network attack techniques and tools, and helps students prepare for the Systems Security Certified Practitioner (SSCP) certification.
(5 contact hours: 2 lecture, 3 lab)
ITIS 2360 Computer Forensics Service, Tools, and Investigation 3 Credits
Prerequisite: ITIS 1360 or permission of instructor.
This course provides students with practical experience in the use of additional computer forensic tools, including those used for disaster recovery, and encryption or decryption of evidence data. Students will receive instruction in other investigative and analytical strategies used in a computer forensics laboratory. Students will work with various scenarios to gain experience in investigation of systems and networks and in appropriate presentation of findings.
(5 contact hours: 1 lecture, 4 lab)

ITIS 2510 Help Desk Concepts and Management 3 Credits
Prerequisite: ITIS 1005 or ITIS 1007 or permission of instructor.
This course develops computer support and customer service skills needed by help desk specialists. Students will study the role of a help desk specialist and examine and apply tools used for help desk management.
(3 contact hours)

ITIS 2890 Information Technology and Computer Science Capstone 2 Credits
Prerequisite: 45 semester credits including 20 credits of ITCS/ITDB/ITIS/ITON courses, a grade of "C" or better in all ITCS/ITDB/ITIS/ITON courses.
This course serves as a capstone experience for Information Technology and Computer Science degree programs by providing students with an opportunity to finalize their electronic portfolio, practice and refine soft skills required in industry, enhance knowledge of ethical considerations in IT, and prepare for employment with skills related to resume writing, job search, and job interviewing. Students will also gain knowledge in their chosen profession through a field observation experience. Students must complete 8 hours of field observation in an IT department.
(2 contact hours)

Operating Systems/Networking

ITON 1011 Comparative Analysis of Microcomputer Operating Systems 2 Credits
Prerequisite: ITIS 1005 or ITIS 1007 or ENGR 1000 or permission of instructor.
This course provides a historical perspective and an overview of operating systems significant to the development of microcomputer. Students will study vocabulary, usage, and basic functionality of a wide variety of previous and current versions.
(2.5 contact hours: 1.5 lecture, 1 lab)

ITON 1070 Operating Systems: Skills and Techniques 1 Credit
Prerequisite: ITIS 1000 or ITIS 1005 or ITIS 1007 (can be taken concurrently) or ENGR 1000; or permission of instructor.
This course provides students with an overview of using a client operating system to manage and interact with the microcomputer and mobile devices. Topics include file management techniques, customizing the environment, managing hardware devices, backup and restore strategies, using administrative and management tools, protecting your computer, and using the O/S command line.
(1.5 contact hours: 0.5 lecture, 1 lab)

ITON 1205 Network+ and Networking Essentials 2 Credits
Prerequisite: ITIS 1005 or ITIS 1007 (can be taken concurrently) or ENGR 1000 or permission of instructor.
This course provides an introduction to local area networking concepts including current networking technology for LANs and WANs (Local and Wide Area Networks), and the Internet. It also helps students prepare for CompTIA's Network+ certification.
(2.5 contact hours: 1.5 lecture, 1 lab)

ITON 1610 Wireless Communications and Networking 2 Credits
Prerequisite: ITON 1115 (can be taken concurrently) or ITON 1205 (can be taken concurrently) or CNET 1100 (can be taken concurrently); or permission of instructor.
This course provides an overview of wireless communications and wireless networking concepts. Students will study the protocols and functionality of wireless networks and equipment compliant devices. Students will use third-party products in a Windows environment to analyze voice, video, and text processing for business information systems, home networks, and the Internet.
(3 contact hours: 1 lecture, 2 lab)

ITON 1735 Cisco Cyber Operations 3 Credits
Prerequisite: ITON 1748, ITON 2250, CNET 1100; or permission of instructor.
This course introduces students to the tasks, and responsibilities of an associate-level security analyst working in a security operations center (SOC). Topics will include cyber security specific features of both Windows and Linux operating systems, an overview of network infrastructure, as well as descriptions of various attack vectors. Also included are principles of cryptography, security monitoring, and intrusion data analysis. This course will help to prepare students to pass the Implementing Cisco Cybersecurity Operations Exam. This course is cross-listed as CNET1735 Cisco Cyber Operations. Students who have taken the course under the alternative course ID should not take this course.
(5 contact hours: 1 lecture, 4 lab)
ITON 1748 Linux Administration I  
Prerequisite: ITIS 1005 or ITIS 1007 or ENGR 1000, ITON 1205 or CNET 1100 or ITIS 1115; or permission of instructor.
This course provides students with basic knowledge of Linux in the use of basic commands, file systems, users and groups, bash shell, process management, text editors, network applications, searching and organizing data, and graphical applications.  
(5 contact hours: 2 lecture, 3 lab)

ITON 1758 Linux Administration II  
Prerequisite: ITON 1748 or permission of instructor.  
This course provides students with the additional skills necessary to administer Linux systems. Topics include process management, advanced user and file access configuration, working with logical volumes and network storage, SELinux security, firewalls, additional command-line tools and troubleshooting.  
(5 contact hours: 2 lecture, 3 lab)

ITON 2070 Installing and Configuring Windows 10  
Prerequisite: ITON 1070 or ITON 1011, ITON 1205 or CNET 1100; or permission of instructor.  
This course provides a technical level of understanding and experience in the areas of configuring, implementing, supporting, and maintaining Microsoft’s Windows 10. Topics include installation, upgrading, configuring, networking, security, virtualization, cloud based computing, and application implementation. This course helps students prepare for one of the Microsoft Certified Professional exams.  
(4 contact hours: 1 lecture, 3 lab)

ITON 2071 Configuring Windows Devices  
Prerequisite: ITON 2070 or permission of instructor.  
This course provides a technical level of understanding and experience for Windows device support technicians or Windows device system administrators who are responsible for building solid identities, protection of content against data loss, mobile device management policy, virtualization with Hyper-V, and application management using a private portal or the Windows Store. This course helps students prepare for one of the Microsoft Certified Professional exams.  
(4 contact hours: 1 lecture, 3 lab)

ITON 2240 Installing and Configuring Windows Server 2012  
Prerequisite: ITON 1070 or ITON 1011, ITON 1205 or CNET 1100; or permission of instructor.  
This course provides a technical level of understanding and experience in the areas of installing and configuring Microsoft’s Windows Server 2012. Topics include installation, configuring, virtualization, networking, security, and administration. This course helps students prepare for one of the Microsoft Certified Professional exams.  
(4 contact hours: 1 lecture, 3 lab)

ITON 2241 Administering Windows Server 2012  
Prerequisite: ITON 2240 or permission of instructor.  
This course provides a technical level of understanding and experience in the administration tasks necessary to maintain a Windows Server 2012 infrastructure, such as user and group management, network access, and data security. This course helps students prepare for one of the Microsoft Certified Solution Associate (MCSA) exams.  
(4 contact hours: 1 lecture, 3 lab)

ITON 2242 Configuring Advanced Windows Server 2012  
Prerequisite: ITON 2241 or permission of instructor.  
This course provides a technical level of understanding and experience in the advanced administration tasks necessary to deploy, manage, and maintain a Windows Server 2012 infrastructure, such as fault tolerance, certificate services, and identity federation. This course helps students prepare for one of the Microsoft Certified Solution Associate (MCSA) exams.  
(4 contact hours: 1 lecture, 3 lab)

ITON 2250 Installation, Storage, and Compute with Windows Server 2016  
Prerequisite: ITON 1205 or CNET 1100; or permission of instructor.  
This course provides a technical level of understanding and experience in the areas of installing and configuring Microsoft’s Windows Server 2016. Topics include installation, configuring, virtualization, networking, security, and administration. This course helps students prepare for one of the Microsoft Certified Professional exams.  
(4 contact hours: 1 lecture, 3 lab)

ITON 2251 Networking with Windows Server 2016  
Prerequisite: ITON 2250 or permission of instructor.  
This course provides a technical level of understanding and experience in the administration tasks necessary to maintain a Windows Server 2016 infrastructure, such as user and group management, network access, and data security. This course helps students prepare for one of the Microsoft Certified Solution Associate (MCSA) exams.  
(4 contact hours: 1 lecture, 3 lab)
ITON 2252 Identity with Windows Server 2016 2 Credits
Prerequisite: ITON 2251 or permission of instructor.
This course provides a technical level of understanding and experience in the areas of deployment, configuration, and troubleshooting of identity services such as Active Directory Domain Services (AD DS) and Group Policy in Windows Server 2016. This course will also cover the deployment and installation of other Active Directory server roles. This course helps students prepare for one of the Microsoft Certified Professional exams.
(4 contact hours: 1 lecture, 3 lab)

ITON 2750 Shell Script Programming 2 Credits
Prerequisite: ITON 1010, ITON 1748; or permission of instructor.
This course provides in-depth coverage of the use of operating system commands to create shell script programs that customize the environment. It includes shell commands, shell grammar, shell script programming concepts, decision structures, looping, functions, arrays, sorting, searching, and dialog boxes for user-friendly scripting. Students will also learn to create manual pages to document scripts.
(3.25 contact hours: 0.75 lecture, 2.5 lab)

ITON 2768 Linux Administration III 3 Credits
Prerequisite: ITON 1748, ITON 1758 or CNET 2720; or permission of instructor.
This course is focused on deployment and management of network services and security running on Linux servers. It is intended to help students broaden their ability to administer Linux systems at an enterprise level.
(5 contact hours: 2 lecture, 3 lab)
